

BIOMETRIC SOLUTION SUITE

Express Liveness

The “ID plus selfie” verification process has opened up a world of remote services integral to everyday life. However, as attacks get more sophisticated in the wake of Gen AI, most organizations’ defenses haven’t.

iProov Express Liveness protects your organization against today’s most pernicious spoof attacks with multi-layered defenses built for speed without sacrificing security.

Verify it’s a real person with a near-instant user experience optimized for rapid conversions.

Make onboarding a success for everyone

Promote inclusivity with a WC3 WCAG 2.2 AA conformant experience and active bias mitigation that drives industry-leading pass rates across demographics.

Strengthen security without sacrificing conversions

Our advanced system goes beyond single-frame selfies, rapidly capturing multiple images and risk signals for advanced presentation and injection attack detection.

Automated threat updates for evergreen security

Gain continuous cloud-based threat updates based on intelligence and new attack patterns studied by the iProov Security Operations Center (iSOC).

Secure and Inclusive by Design

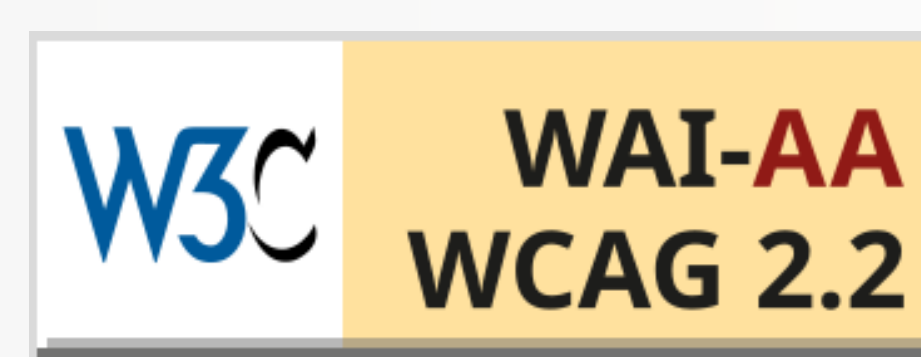

iBeta PAD Level 1 and Level 2

Conformant to iBeta Presentation Attack Detection (PAD) Level 1 and Level 2, thwarting all attacks, including 2D and 3D masks, printed and digital photos, and video replays.

W3C WCAG 2.2 AA and Section 508

Conformant to Web Content Accessibility Guidelines (WCAG) 2.2 AA and Section 508 to provide a good user experience for as many people as possible, regardless of abilities.

More Than Software

Tailored Consultation

We analyze your use case and tailor recommendations based on factors such as region, risk profile, attack landscape, platform, and hosting requirements.

Fully-Managed Service

We manage the hosting, technical support, and ongoing optimizations drawing on experience with the world's most security-conscious organizations.

Biometric Threat Experts

An expert team of threat intelligence experts, computer scientists, and ethical hackers deliver updates based on classified threat intelligence and cutting-edge research.

We needed a technology partner to support our mission to make secure digital identities available to everyone. iProov was the obvious choice. They hold privacy and security in the highest regard.
